The attached index appears to be releasable, since it did not seem to identify any PII in the document description for each record.

Yes. I would suggest sending the requester an index while the fee waiver issue is being worked out. I am pretty sure the index is releasable, but should look at it. There is a potential this could be a large time-consuming exercise as most of records were created 15-20 years ago and will not be in electronic form and are probably located in the off-site Federal Records Center.

I can pull an index of records if they are all in SEMS, and my memory is that the records were electronic. Should I just send him the index as a start, as he asked ? I'll send it to Scott first so he can verify the index is releasable.

Hi Jamie & Scott – I believe that you responded to a previous FOIA from the same requestor for Martha C. Rose Chemicals, Inc. See attached for a new FOIA for same. The requestor has asked for a fee waiver, which I think HQ will likely grant, and expedited processing, which I doubt HQ will grant. I talked to the requestor briefly and he indicated that he'd like to possibly do a file review or see an index or discuss the scope of the request.

Thanks,
